

We are suprolos, beings from the suprolo world which consists entirely of lila energy. We ourselves are also born from it. We call this our suprolo lila. The suprolo lila[©] is our heart's secret which consists of an enchanting, luminous, wondrous white transparency. In this light world lies Llumeneres, the small hamlet high in the mountains, where we are born in the Aquamarine Waterfall deep in the Xerc Cave.

There we play our sun games and create our summer palaces on the shores of the beaches of the world. We like very much to play with light, which is why we are called the light beings of Llumeneres. We can do anything with our lila light. For example, we can make suns in the pitch-dark night. We can make it snow in the sun and we can set the mountains on fire.

From Llumeneres we swarm out to all directions on Earth through the infinite blue skies to planets, suns, moons and stars. We have no fixed abode; we are at home in the whole of the universe. But in Llumeneres we meet, we gather there to chat and have fun. We are an immense family of millions and millions of suprolos.

We do everything with the bluish white light of our suprolo lila, a light made up of all the lights that exist. Our bodies are made of the most beautiful rainbow colors, and we stand out brightly against the blue sky above the ever sunny Llumeneres. We move by means of suprolo lila energy. We are faster than sound and light, which is why humans cannot see us on our journeys.

The fascinating world of suprolos [©]

a short story by
The Artists Suprolo

When we are in Llumeneres, the Artists Suprolo visit us and they talk to us and portray our colorful and lila vibrations. When we are there, we dance in the bright moonlight to the sounds of the suprolo-llocings[©] and we tell each other all kinds of stories as we sit around the iridescent fires.

Do you want to know what we look like? We have the most different crazy shapes. Suprolos have no head, also no hair, nose, ears, mouth, teeth or eyes. It is very comical to have no hands or feet. We hear, see, smell, feel, touch and act through suprolo lila energy.

We are radiant and transparent like air and can look like xenon light. When we show ourselves at night we like to be of white light and during the day we take on a bluewhite color. Because we are made of suprolo lila energy, we can never die, we are never tired, we fly right through the thickest walls and move easily under water. We can also move right through the earth and be in the heart of the sun. We always remain young. We never sleep. We are cheerful, adventurous and very humorous.

We are very independent light beings of suprolo lila energy. We never marry, but remain single for ever. With our suprolo lila we keep in touch with all other suprolos. We find our unity in our bluewhite light energy, which is one of the greatest powers of our suprolo lila.

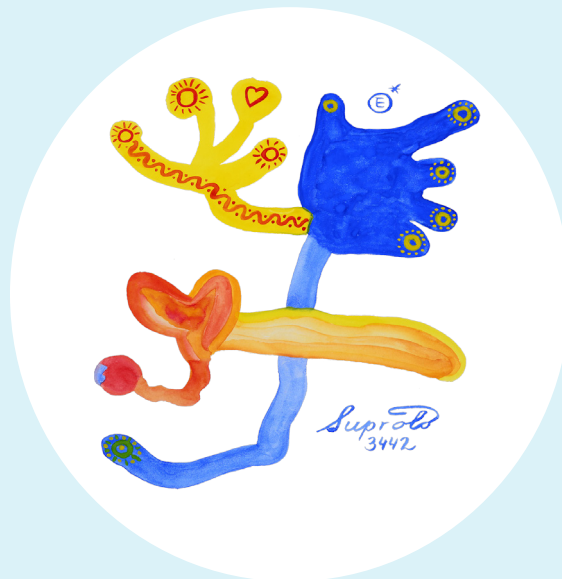

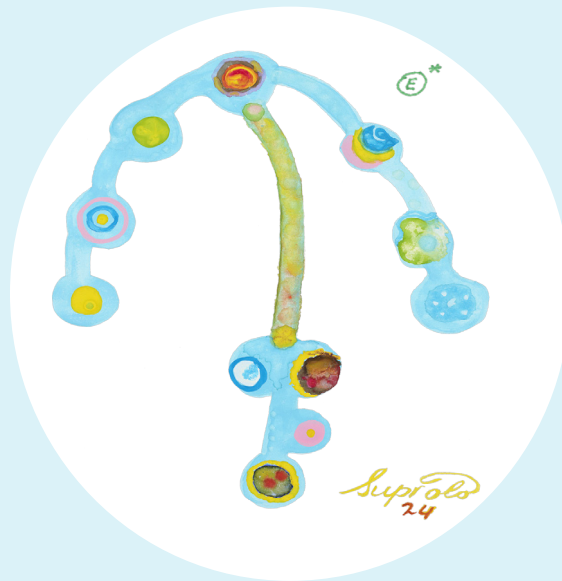

It is very funny to dance together, perform the craziest antics and celebrate. Humming, dozing in the sun on top of the mountain and eating whipped cream are our favourite hobbies. Sometimes we go to the flowers to suck some honey. Our life is one big game.

Our world consists of endless abundance and great riches. When we feel like something, we imagine it and immediately it is there. A villa with a swimming pool is all we have to wish for and look, it is already there. Because we cannot die we don't actually need anything and we are never afraid.

New suprolos are born every day. The birth of a suprolo is a joyous celebration. All suprolos who want a baby gather around the Aquamarine Waterfall. We focus our suprolo light on the grains of sand falling down into the source of the Llumeneres Brook. As we hum softly, the tiny suprolo babies jump out from the sand grains of the stream onto the water lilies.

They are immediately young adults. They also like orange juice, honey and whipped cream a lot. Throughout the year there are festivities around these births, so there are always suprolos in Llumeneres.

We like to visit humans and other beings in the universe. The people on Earth are our special friends. We often visit them, help them and cheer them up. We have a lot of fun about the crazy things people sometimes do. People are protected by us. We bring warming light to their hearts.

When children sleep, we hover over them and let them have wonderful dreams. We always bring people delight, joy, sunshine and happiness.

When we are in Llumeneres or other places in the world, we can see everything in the world and in the universe and beyond. We are in close contact with all other suprolos wherever they are, through our suprolo lila energy. With that energy we know everything, we can see everything in the dark and we can see right through everything. There are no secrets from us.

With our suprolo lila energy we bring everything to life wherever we are. And thanks to the redgoldwhite lila light, new things are constantly being created in our lila light world.
